

## My Preps Using Categories Math 11 Example Setup

Set up procedures for courses such as the Math11 example below based on Curriculum Organizers and weighted to recommended Ministry guidelines.

Under the heading Prep Units/Categories identify the organizers and their respective weights for reporting purposes. If, as in this example you will also have a course final exam include this here as well.

Assessment Types and their associated weights used for your Curriculum Organizers listed above, must be assigned. You will need a final exam with the same weight as that above.

I recommend setting up all weights to total 100. Set your defaults and save.

The screenshot shows the 'Prep Detail' window for 'PMath 11'. It is divided into four main sections:

- Prep Classes:** A list of classes with '1-0-0-01 MATH 11' selected. Buttons for 'Select Classes' and 'Delete' are at the bottom.
- Prep classes Report Cycles:** A list of report cycles with 'Exam Grade' selected.
- Prep Units:** A table listing units with their weights and default status. A black arrow points to the 'Final Exam' row.
- Prep Assesment types:** A table listing assessment types with their weights and default status. A black arrow points to the 'Final Exam' row.

Units	Weight	Default?
Number	20	<input checked="" type="checkbox"/>
Patterns & Relations	30	<input type="checkbox"/>
Shape & Space	20	<input type="checkbox"/>
Statistics & Probability	10	<input type="checkbox"/>
Final Exam	20	<input type="checkbox"/>

  

Description	Weight	Default Assesment type
Assignment	25	<input type="checkbox"/>
Final Exam	20	<input type="checkbox"/>
Quiz	15	<input type="checkbox"/>
Test	40	<input checked="" type="checkbox"/>
