## LICE CHECKS

Students were checked for lice this week at school. Head lice is common in school-aged children. Lice do not cause disease but itchiness from them can be irritating and uncomfortable for children. Head lice spread easily to others, so it's important for families to help prevent and control its spread. Outbreaks are more common following vacations.

### How to prevent lice:

- Check your child's head every week.
- Teach your child not to share head gear (hats, hair accessories, scarves, helmets, combs/brushes, etc.)
